

# Van Nuys Airport Quieter Nights Program Statistical Update and Summary Q2 2024

August 2024

# Quieter Nights Background

- LAWA implemented the VNY Quieter Nights Program (QNP) in March 2020 to provide relief to residents affected by the change in flight paths due to the FAA's SoCal Metroplex Project.
- Voluntary program intended to reduce nighttime jet operations.
- Encourages *jet* aircraft operators to avoid arrivals and departures at VNY between 11 p.m. and 7 a.m. whenever possible, unless the aircraft are involved in military, law enforcement, emergency, fire or air ambulance/life flight operations.
- Because QNP is voluntary there are no “violations” or enforcement mechanisms.
- LAWA's role is to continue to spread awareness and importance of QNP and encourage participation.

# Lower % of QNP Operations Despite New “Norm”

VNY Quieter Nights Program  
Nighttime vs. Total Jet Operations

■ Nighttime Jets	4,514	2,797	4,097	4,361	4,521	2,221	1,121
■ Daytime Jets	53,759	44,063	65,810	65,192	60,357	29,407	14,596
● % of Nighttime vs Total Jets	7.7%	6.0%	5.9%	6.3%	7.0%	7.0%	7.1%

- Jet operations at VNY have increased steadily since 2020, exceeding prior years (new "norm")
  - +19.8% in 2021 vs. 2019
  - +13.4% in Q2 2024 vs. Q2 2019
- Similar increases seen at nearly all GA airports across the country (higher demand for chartered business jets)
- Despite new “norm,” nighttime jet operations as a percentage of total jet operations are below 2019 levels despite the overall increased demand for chartered jets.
- Staff believes this is due to the QNP rollout and continued efforts since 2020 launch

# Annual Comparison

## VNY Quieter Nights Program - Annual Comparison

Average Jet Operations Per Night (11 p.m. to 7 a.m.)

- Nighttime jet operations in Q2 2024 would have averaged 13.3 per night instead of the current 12.4 if we remained at the 7.7% seen in 2019 versus the current 7.1% of total jet operations. Staff believes this lower percentage is holding due to the QNP.
